## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 5-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Appenzeller et al. (US 2004/0120183 A1).

Respect to claims 1-2, Appenzeller discloses a method for making a capacitor in which a dielectric (106) is used, wherein a complex oxide (SRO layer aka  $\text{SrRuO}_3$ , 107) is used as a mask when the dielectric film (106) is subjected to reactive ion etching, and the mask material (107), which is directed contact with the dielectric (106), is used as an upper electrode of the capacitor after the reactive ion etching is performed (Fig 1, paragraph 0030-0031, 0035-0036, 0046-0047). Respect to claim 3, Appenzeller discloses the complex oxide (107) is a conductive oxide (paragraph 0031). Respect to claim 5, Appenzeller discloses the dielectric film (106) contains PZT as a main component (paragraph 0030). Respect to claim 6, Appenzeller discloses platinum (Pt) is used as a material for a lower electrode of the capacitor (paragraph 0027).

### ***Response to Arguments***

Art Unit: 1765

3. Applicant's arguments, with respect to Fujiki et al. reference (in page 4-5 of the remark), filed 4-10-2006, with respect to the rejection(s) of claim(s) 1-3, 5-6 under 35 USC 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Appenzeller.

4. Applicant's arguments, with respect to Sun et al. reference (in page 5 of the remark), filed 4-10-2006, with respect to the rejection(s) of claim(s) 1-3, 5-6 under 35 USC 102(e) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Appenzeller.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1765

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
